DETAILED ACTION

Allowable Subject Matter

Claims 20-25 and 31-33 are allowed.

The following is an examiner's statement of reasons for allowance: Essentially, the arguments presented by applicant in the Remarks accompanying the amendment of March 24, 2005 are persuasive. As applicant notes, the color card of Drew is comprised of a sample of the material to be used in an architectural or interior design setting. The color chips are not compared to a similar color to find the best match, but rather are placed on a surface to assist a user in determining a preferred color to be used on the surface. The purpose of the Drew method is quite different from that of Teter, which does disclose a card for matching colors in a similar fashion to that of the claimed invention. Because the method of Drew is directed to selecting a desired color to go on a given surface, rather than matching colors, there is no particular advantage to viewing the surface through a window. As a result, there is no suggestion or motivation to modify the method of Drew by viewing an underlying surface through a window as disclosed by Teter. While Teter does disclose the use of windows as claimed, there is no suggestion or motivation to provide chip sections which are attached by tear lines to the card. These sections allow a user to view a broader area of a color before opening the window to compare the color to an underlying surface to find a match. Because the prior art when viewed as a whole does not suggest or disclose all of the limitations of the claims, the claims are allowed.
